THE QUALITY LUBRICANT

# ONE OIL

## MULTIPLE APPLICATIONS

**Protect your commercial vehicles & machinery**

New technology in engine development, increased demands for reduced greenhouse gases and improved fuel economy are requiring smarter thinking in engine lubricants. New tools are being developed throughout EU member states to determine and measure CO2 emissions for new trucks in an important new transparency in the fight to reduce fuel consumption.

The need to keep all the variety of engines working healthily is crucial and understanding what the vehicle manufacturer demands is becoming increasingly more challenging. Faced with this dilemma operators are forced to purchase multiple products that meet different specifications to satisfy warranties, many of these are sometimes the same viscosity grade causing further confusion.

The Witham Group have been experts in engine lubricants for over 97 years, working with the latest technologies and original vehicle manufacturers to ensure customers get maximum performance, minimum emissions and reduced failure problems.

Our best selling Masterfleet Universal Oil helps rationalise and simplify the choice of lubricants needed in over 95% of all heavy duty applications and helps eliminate confusion without compromising on quality or warranty suitability.

This single product could help your business save time and money with extended drain times, cleaner engines, decreased breakdowns and reduced emissions all in a single purchase.

### The Advantages:

- A universal product that will cover over 95% of all heavy duty diesel applications.
- Lower inventory costs - instead of purchasing multiple products in uneconomic pack sizes purchase one lubricant.
- Eliminate the potential of the wrong lubricant being used in the wrong application. One product, no mistakes.
- Approved to meet a wide variety of manufacturers specifications.
- Simplify your internal purchasing process.
- Purchase from a company whose products and reputation you can trust.
- Priced to ensure switching is not prohibitive.

### Specifications:

Qualube Masterfleet HD FS 10W40 is recommended where the following specifications are required:

- E6, E7 & E9
- MB 228.51 & MB 228.31
- MAN 3477, M3271-1
- Caterpillar ECF-3
- Mack EO-O Premium Plus
- Renault RLD-3 & RLD-2
- Deutz IV-10LA (backward compatible to DQC-III-10LA)
- API CJ-4
- MTU category 3.1
- Volvo VDS-4 (backward compatible to VDS-3)
- Cummins CES 20081
- Mack EO-N Premium Plus
- Detroit Diesel 93K218

In addition, where fuel sulphur levels are below 50 mg/kg, this product is also backward compatible to Deutz DQC-III-10 & DQC-IV-10).

### We also Provide:

Engine Lubricants  
Passenger Car Motor Oils  
Agricultural Lubricants  
Hydraulic Lubricants  
Environmental Lubricants  
Horticultural Range  
Gear Oils & Transmission Fluids  
Grease Range  
Classic Lubricants  
Anti-Freeze & Coolants  
Workshop & Cleaning Products
